eSKID DUAL CHARGER

The eSKID Dual Charger is designed to get you charging fast. Built for portable charging applications, this drop-in-place solution accelerates access to electric charging.

With the ability to charge two trucks at the same time, it provides a wide range of flexible charging options. Discover how this portable charging solution allows you to start charging in days, not weeks.

▾ ELECTRIFY YOUR FLEET

QUICK INSTALLATION

The eSKID is preconfigured, reducing the time it takes to install EV charging infrastructure.

FLEXIBLE

Provides the ability to charge two trucks at once with 62.5 kW output or divert full power (125 kW) to one charger to fast-track single truck charging.

PORTABLE

Without the need of permanent concrete pads, the eSKID can move wherever you go and relocated as your business grows, moves, and evolves.
